

Health Care on the Ballot:

Taking on Corporate Greed Sample Social Media

[LINKS TO GRAPHICS](#) (Please feel free to include your organization's logo opposite ours)

Sample copy:

- Every American knows that we pay too much for health care, but many don't know WHY. We must address corporate greed, driven by #consolidation and #pricegouging among big hospital and pharmaceutical corporations!
- More than 100 million Americans are saddled with #medicaldebt, forced to make impossible choices between health care and basic human needs. Let's demand #transparency, fair pricing, and accountability to ensure health care is a right, not a privilege.
- From 2013 to 2021, hospital ownership of physician practices rose from 15% to 53%. This consolidation is driving up costs and reducing competition. It's time to address this issue and protect patients from #corporategreed in health care.
- Nearly 90% of large employers say rising health care costs threaten their ability to provide benefits. We need to protect both businesses and employees from the #corporategreed driving these increases and ensure health care remains affordable for all.
- Families shouldn't be struggling to pay for a doctor's visit while health care corporations & CEOs extort skyrocketing profits, salaries & bonuses. Policy changes like strengthened #hospitalpricetransparency and #siteneutralpayments must be put into place.
- Over 70% of new drug patents are for existing medications, a tactic used to extend market exclusivity and jack up prices. We must crack down on patent gaming by ensuring easier access to generics & addressing tactics big drug companies use to systematically block competition.

DID YOU KNOW?...	DID YOU KNOW?...	DID YOU KNOW?...	DID YOU KNOW?...
 <p>From 1990 to 2023, hospital prices grew a staggering 600%</p>	 <p>More than 100 MILLION Americans are saddled with medical debt.</p>	 <p>70% of drug industry profits go to only the top 25 prescription drug companies in the U.S.</p>	 <p>Nearly 90% of large employers say rising health care costs will threaten their ability to provide health care benefits to employees.</p>
